VersaView 5000 Display Product EOL

VersaView display products EOL

- [VersaView 5400 Panel PCs](#)
- [VersaView 5200 Display Thin Clients](#)
- [VersaView 5100 Monitors](#)
- [Bulletin: 6200P Panel PCs, 6200T Panel Thin Clients, and 6200M Panel Monitors](#)

The VersaView® display product line has experienced extreme component availability issues which have brought forth our need to take this product to End of Life (EOL) status sooner than we intended. We have had a long-term migration plan to the newer ASEM™ 6300 product line. ASEM 6300 industrial computers, monitors and thin clients have been available for order for some time with additional products planned in the pipeline.

11/15/22 - EOL status (still available, but planning for discontinuation)

Discontinuation is planned as we run out of stock on each specific catalog number. Products may sell out before the targeted discontinue date. Expected run out dates could be sooner than expected on select catalog numbers. The discontinue date in SAP is not correlated with the inventory run out date. To check product availability and to purchase in your region, contact your [local Allen-Bradley distributor or Rockwell Automation sales engineer](#).

Rockwell Automation plans to provide repair services and technical support for these products for as long as practical. If you are interested in these services, please contact our [technical support](#). Most services are chargeable and may require a technical support contract.

Migration Solutions - Rockwell Automation can help you identify your options for leveraging your existing automation investment across the enterprise and throughout the lifecycle. Use our [Product Lifecycle Status](#) search tool to find specific lifecycle information by catalog number.

As always, we will make every attempt to satisfy your needs. Please feel free to contact me with any concerns or transition issues.

Best Regards,

Don Grzanna - Product Manager

6200P 12" Panel PC Replacements

The 6200P panel PC is being replaced by the ASEM 6300P panel PC line. ASEM 6300P models offer an upgraded Intel Celeron processor similarly priced to the Intel Atom processor available in some of the 6200P catalog numbers. Option availability of bezel, RAM, SSD, etc. can be checked using the configuration wizard on the product webpage or the ProposalWorks™ tool.
